The Digest of Statistics, a biennial publication of the Directorate of Economics and Statistics, is a comprehensive document presenting a statistical profile of different sectors of economy that helps in analytical appraisal of the achievements registered so far as a result of investment made for socio-economic development of the State. Besides, this publication presents demographic, meteorological, occupational classification of working force, import export, nine-fold classification of land use data in various administrative divisions of the State. Tables pertaining to NSDP estimates for a comprehensive perception of growth in economy, vehicular traffic, activities of judiciary, communication net work and financial statistics are also covered in the publication.

The present issue for 1993-94 is containing upto date data on co-operative sector unlike in the previous issues and time lag has considerably been reduced.

Care has been taken to broad base the coverage and content of the publication to cater to the felt needs of planning mechanism especially after introduction of the de-centralised planning and its further intensification.

It may not be out of place to mention that the department has registered considerable demand for this publication by the users both in public and private sectors that shows the utility of this document is widely acclaimed. The endeavour of Directorate of Economics & Statistics to accomplish the task under challenging circumstances confronting data collection , needs to be appreciated.

Any further suggestion for widening the scope and coverage of the publication will be welcome.

CHAPTER - I

AREA AND POPULATION

The first attempt to take a census in Jammu and Kashmir was made in 1873. The results, however, were not much satisfactory. In 1891 and 1901 regular census operation was conducted. However, the operations were in complete confirmity with principles and instructions emanating from the Government of India in 1911 to 1941. In 1951, the conditions in the States were not conducive to conduct of the census. In 1961, 1971 and 1981 the census was taken as part of the census of India. No census was conducted during 1991 due to administrative difficulties.

The chapter contains a set of twenty tables indicating area, total population, grwoth of population, age structure, working force, scheduled caste population, number of villages etc.

CHAPTER - III

CLIMATE

Statistics relating to temperature and rainfall are collected by the meteorological and the Irrigation & Flood Control departments. This chapter indicates mean maximum/minimum temperature at Srinagar and Jammu stations and rainfall recorded at various stations in the State.

Rainfall received during the previous 24 hours is recorded at 8.30 hours (IST) at the rain guage each day. A day recording rainfall of at least one tenth of an inch is taken as a rainy day.

The maximum and minimum temperature is recorded at the observatories at 8.30 and 17.30 hours (IST).

CHAPTER - IV

AGRICULTURE

This chapter presents data on area as per village papers with its nine-fold classification, pattern of operational holdings, crops, production and yield rate of crops, agricultural index numbers, distribution of fertilizer, fungicides and fruit plants. Data are also given on number of trctors and other agricultural implements available. The primary sources of agricultural statistics are the Agriculture Statistics Return and the crop forecasts prepared by the Revenue Department. The concepts and definitions used are those prescribed by the Union Ministry of Agriculture. Some specific terms/items appearing in this section are briefly defined below :

1. Area according to village papers.

Area according to village papers is the reporting area for which data on land use classification are available i.e. the area as per papers prepared by the village patwari. It does not correspond to the total geographical area of the state as the Revenue Department do not maintain the records of those areas which are not fit for habitation. The area maintained by the Forest Department is also not included in it.

2. Forests

This covers the berun-line forests viz, forests outside the demarcation line of the forest area maintained by Forest Department i.e. excludes the area maintained by Forest Department.

3. Land put to non-agricultural uses.

This includes entire land occupied by buildings, rivers, canals and other lands put to uses other than agricultural.

4. Barren and Un-culturable land

This includes all barren and un-culaturable land like mountains, deserts etc. Land which can not be brought under cultivation except at an exorbitant cost is also included under this item.

5. Permanent pastures and other grazing lands

This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is also included in this column.

6. Land under miscellaneous tree crops etc.

This includes cultivable land which is not included in net area sown but is put to some agricultural uses. Land under thatching grasses, bamboo bushes and other groves for fuel etc which is not included under orchards is classed under this category.

7. Culturable waste.

This includes lands available for cultivation whether or not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for onr reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may be in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession should also be included in this category at the end of five years.

8. Fallow lands other than current fallows.

This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reason for keeping such lands fallow may be one or more of the following :

1. Poverty of the cultivator.
2. Inadequate supply of water.
3. Silting of canals and rivers, and
4. Unremuneratuve nature of farming.

9. Current fallows.

This represents cropped areas whcih are kept fallow during the current year. For example, if any seedling area is not cropped again the same year, it is treated as current fallows.

10. Net area sown.

This area includes total area sown with crops and orchards counting area sown more than once in the same year only once.

11. Total cropped area

Total cropped area represents the total area covered with crops i.e. the sum total of area covered by all the individuals crops, areas sown with crops more than once during the year being counted as separate areas for each crop.

12. Area sown more than once.

It includes the area on which crops are cultivated more than once during the agricultural year and is obtained by deducting net area sown from total cropped area.

CHAPTER - V

IRRIGATION

Statistics on source-wise area irrigated with crops receiving irrigation are given in this chapter. The major source of irrigation in the State continues to be "canals" which accounted for about 93% of the total area irrigated during 1993-94. Net area irrigated is given in table 5.00 while table 5.01 depicts area irrigated under various crops viz., gross area irrigated.

CHAPTER - VI

FOREST

Forest has assumed great importance in our economy as a substantial revenue yielding industry. Revenue realised from forest went up to Rs. 43 crores in 1992-93. This chapter presents data on area under forests by district and by categories viz coniferous, non-coniferous un-commercial reserve and rakhs/wild life reserves. Data are also given on major and minor products, out-turn of timber, export outside the state and revenue realised. The definitions adopted in the tables are indicated below :

a) Coniferous forests: Coniferous forest is one in which 80% or more area falls under coniferous species of trees.

b) Non-coniferous forests: Non-coniferous forest is one in which 80% or more area is covered by non-coniferous species of trees.

c) Reserve forests: Reserve forest is one which is permanently dedicated either to the production of timber or to other specified purposes and in which right of grazing and cultivation is seldom allowed.

FISHERIES

The State of Jammu and Kashmir abounds in natural streams, lakes and hilly torrents which on one hand are source of attraction for the tourists and on the other, offer scope for development of fish production. The Kashmir "Trout" is famour throughout the country.

Data on species-wise fish caught, year-wise number of licence holders together with fishermen population, labour force engaged in the pursuit and number of fishing implements are given in this chapter.

CHAPTER - VIII

Livestock, Sheep and Animal Husbandry

Livestock rearing is an important economic pursuit with our rural and the nomadic Gujjar and Bakarwal population. Most of the stock, however, is local and inferior in quality. Various steps are being taken to improve the quality as also quantity of livestock. The source of livestock data is the live stock census which gives figures by district as also by tehsil. It may, however, be pointed out that bulk of our livestock population is migratory and is recorded in the district and its stay at the time of enumeration. The district and tehsilwise breakup, therefore, is not of much significance but of academic importance only.

This chapter gives data on the number of livestock, poultry, functioning of livestock/sheep breeding centres/farms, health coverage provided to the livestock etc.

X - CHAPTER

CO-OPERATION

The growth of co-operative movement in the state has registered significant progress during the last few years. Its scope too has significantly enlarged by extending its coverage not only to multipurpose co-operative societies but also to co-operative unions of farmers, labourers, fishermen, milkmen, transport etc. Year-wise data on number of societies with membership, loans advanced, amounts overdue together with paid up share capital etc. of Central Co-operative Bank and credit societies are covered in this Chapter.

CHAPTER - XI

FOOD AND SUPPLIES

Though food production in the State has gone up quite high from 58.31 lakh quintals in 1865-66 to 145.49 lakh quintals in 1993-94, the State is yet to achieve self-sufficiency and imports from outside the State continue. This chapter gives data on year-wise import of food-grains from outside the State with the amount of subsidy given on the rationed supplies. Year-wises rationed population in various towns, cities and muffasils and off take of food-grains from government depots are also given.

CHAPTER - XII

ELECTRICITY

Jammu and Kashmir has immense potential for development of hydraulic power resources. For the past three decades considerable work has been done in this behalf, of course within the limitations imposed by the resource constraint. From a negligible base of 3 to 4 megawatts in 1950-51, the installed capacity has risen to about 300 megawatts. Excluding a few diesel sets and the Kalakote Thermal Unit, the entire power is produced by the hydro power projects. Most important projects are the Lower Jehlum with 105 megawatts. Chenani with 25.00 megawatts, upper Sindh with 22.60 megawatts and Kalakaote (Thermal) with 22.50 megawatts. Power production in the State would get a boost when the central project of Salal is fully completed. Work is going on some other projects also. The important future projects are the Dulhasti project, Uri project and Baghliar project etc.

This chapter presents data on installed capacity, power generation, purchase, sales, rural electrification, energising of pump sets, number of electrical installations in the State and revenue realised by the electrical department.

CHAPTER - XIII

INDUSTRIES AND MINERALS

Jammu and Kashmir State which had not seen much of industrial growth due to lack of infrastructural facilities such as easy transport, electricity and other factors has shown signs of industrialisation during the past few years. The setting up of more power generating stations, wide-spread road net work and coming up of the state on the railway map of the country have greatly helped in creating an atmosphere conducive to the growth of industries in the state. Arrangements of easy credit, raw material, technical know-how, subsidies etc., are some of the important motivating steps which the government has been taking. A number of large and medium scale units have come up. The number of registered factories has gone up to 876 ending 1994 and number of small scale units registered with the Director of Industries has been over 0.35 lakhs with employment of 1.51 lakhs ending 1993-94.

The tables in this chapter give the data on the number of units, employment therein, incentives offered and production reported. Information is given with regard to handicrafts, handlooms and khadi and village industries units too. A few tables on mining activity in the state are also given.

CHAPTER - XIV

EMPLOYMENT

Employment exchanges were established at Srinagar and Jammu for the registration of un-employed persons in 1958-59. Since then the number of exchanges has gone up to 17. This chapter gives data on number of employment exchangesas, registrations, placements made and qualification-wise number of persons on live register. However, the statistics of employment exchanges have two main defects. Firstly, all the unemployed do not get themselves registered with the employment exchanges. Secondly, some of the registered may not be actually un-employed but only in search of better jobs. The data have to be used keeping in view these limitations.

CHAPTER - XV

BANKS, INSURANCE AND SAVINGS

This chapter presents data on district-wise number of bank branches, deposits and advances made by scheduled commercial banks, number of insurance policies with sum assured and net/gross value of small saving securities. There has been great dispersal of financial facilities during last few years and the number of bank branches has gone up to 791 in 1994 as against 106 in 1971. The deposits and advances of these banks have also registered considerable growth.

CHAPTER - XVI

ROADS AND BUILDINGS

Lack of Railways and very limited scope for water transport leave the State with roads as the only means of transport. The development of road net work in the state, is therefore, receiving attention of the government on priority basis in our developmental plans. Road length maintained by the P.W.D. has shown considerable growth over the past three decades. While reliable data for the earlier years are not available, the figures indicate that the road length has increased by over two thousand kilometers during the period 1985-86 to 1993-94. This is apart from the length transferred from the R&B Department to the other departments such as the Border Roads Organisation. Departments other than the R&B maintain roads for their departmental purposes. But almost all of these roads are open to the general public also. These departments include the Forest, Irrigation. Flood Control Deptt. and the B.R.O. The road length maintained by these departments is quite substantial.

The tables in this chapter indicate total road length maintained by the State P.W.D. and by other departments. Rates of building material in the public sector, wage rates of construction workers and the number of permissions granted for construction of houses are also given.

CHAPTER - XVII

ROAD TRANSPORT

As we have said in the earlier chapter, roads are the only mode of transport available to us. Therefore, side by side with the road length, the number of vehicles has also shown great increase. The annual addition over the latest years' has been in the neighbourhood of 13000.

This chapter gives data on public/private transport fleet and operational details of Road Transport Corporation. Besides, transport facilities available in major cities of the State as provided by the Stae Road Transport Corporation also are indicated.

CHAPTER - XVIII

WATER TRANSPORT

Three kinds of boats float on river Jehlum/lakes of the Valley. Firstly, there are house boats, which provide residential accommodation to tourists. Secondly, there are shikaras used for carrying passengerss/tourists over the lakes and rivers. Thirdly, there are doongas used for transport of goods from place to place. The data on number of boats and persons engaged therein are shown in this chapter.

CHAPTER - XXI

TRADE AND COMMERCE

This chapter presents data on trade and commerce especially about goods exported from and imported into the State, number of excise shops. octroi posts, vehicles coming to going from the state/valley etc. However, the data with regard to exports and imports are not in terms of value but indicate quantity only and not the real magnitude of the trade in case of many items from which kind/quality is primarily important. The information with regard to the weight of goods imported/exported is collected by the Excise Department at various toll posts. Attempts are, however, under way to collect the data on value also.

CHAPTER - XXII

EDUCATION

Spread of education in the State has made great strides during the past decades of planned development and considerable educational facilities, are being made available even in remote, hilly and backward areas. Besides, mobile educational institutions have been provided for nomadic population of Gujjars and Bakarwals.

This chapter presents data on number of educational institutions by categories, students on roll etc. Data are also given on trained/un-trained, teacher-pupil and institution pupil ratios, state-wise enrolment, input/out-turn of prefessional/technical institutions and board/university examination results too are covered in the chapter.

CHAPTER - XXIII

VITAL STATISTICS

The primary reporter of birth and death events in rural areas is the village chowkidar while in cities and towns the municipal workers attend to this job. Registration of births and deaths, however, is far from complete and efforts are being made to get registered larger number of vital events occuring in the State. Year-wise data relating to births and deaths and on birth rates by district and sex are given in this chapter.

Birth and death rates as thrown out by the Sample Registration Scheme are also given as the rates based on normal registration system are not much reliable.

CHAPTER - XXIV

HEALTH AND FAMILY WELFARE

This chapter gives basic data on health cover provided in the shape of hospitals, dispensaries, bed strength available and medical personnel in the State. Number of patients treated, number of operations performed, vaccinations made against small-pox, malaria and typhus are also shown. The tables throw light on family planning programmes and the achievements made there-under.

CHAPTER ____XXV

PUBLIC HEALTH ENGINEERING

Supply of potable drinking water is one of the basic programmes of our development plans. Most of our villages have been identified as disadvantageous in respect of availability of drinking water supply and efforts are under way to cover these villages in a phased manner. This chapter presents data on coverage of villages and rural population, number of installations and year-wise growth of tube-wells and dug-walls etc.
